

0123456789
ABCDEFGHIJKLMNOPQRSTUVWXYZ

The length of data can be from 5 to 12 characters.

The Royal Mail Bar Code (RM4SCC) consists of four parts; the International Prefix (optional), the Outward Code (required), the Inward Code (required), and the Delivery Point Suffix (optional).

The International Prefix, when used, contains three numeric digits.

The Outward Code contains from two to four characters in one of the following seven forms where A is alphabetic and N is numeric:

ANA
AAN
AANN
AANA
AN
ANN
AAA

The Inward Code contains one numeric character followed by two alphabetic characters.

The Delivery Point Suffix, when used, contains one numeric digit followed by one alphabetic character other than C, I, K, M, O, and V.
